PROFESSIONAL SUMMARY

Dedicated Information Technology Graduate and aspiring Full Stack Developer with internship experience in software engineering and hands-on expertise in MERN stack development. Skilled in building scalable web applications, database management, and modern development frameworks. Strong problem-solving abilities with experience working in Agile environments and collaborative development teams.

WORK EXPERIENCE

Rangiri Holdings Pvt(Ltd) – Intern Software Engineer

June 2025 – Dec 2025

Technologies: React.js, Next.js, Typescript, PHP Laravel, Tailwind CSS, Github

- Developed and maintained responsive web applications using Next.js, React.js, TypeScript and Laravel.
- Contributed to the development of multiple production websites, including the Rangiri Holdings Corporate Website, Rangiri Aqua Website and RMIT University Website, by developing responsive user interfaces and reusable frontend components.
- Collaborated with developers and stakeholders throughout the software development lifecycle of Internal Business Management System, participating in requirement analysis, testing, debugging, and deployment activities.
- Utilized GitHub for version control, code management, and team collaboration.

EDUCATION

Sri Lanka Institute of Information Technology

Sep 2022 – Sep 2026

BSc(Hons) in Information Technology Specializing in Information Technology – Second Class

- Relevant Coursework: Software Engineering, Web Development, Data Structures & Algorithms, Database Systems, Networking, AI/ ML Engineering

Ave Maria Convent

G.C.E. Advanced Level Examination (2021)

- ICT – B | General English – A | Combined Mathematics – S | Physics – S

G.C.E. Ordinary Level Examination (2018)

- Achieved 9A Passes

TECHNICAL SKILLS

Programming Languages

- Java, TypeScript, JavaScript, Python, PHP, C, C++, Kotlin

Frameworks & Technologies

- React.js, Next.js, Vite, Three.js, Node.js, Express.js, Spring Boot, Laravel, FastAPI, Tailwind CSS

Databases & Machine Learning

- MongoDB, MySQL, Oracle, Firebase, PyTorch, Scikit-learn, Pandas, NumPy, SciPy

Tools & Concepts

- GitHub, Postman, Power BI, Figma, VS Code, IntelliJ IDEA, Android Studio, REST APIs, MVC Architecture, Agile Development, API Integration

PROJECT EXPERIENCE

ATMOSPHERA

July 2025 – May 2026

AI-powered system for analyzing exoplanet spectral data to detect atmospheric key gases, identify potential biosignatures, and generate planetary habitability profiles for astronomical research.

- Developed as part of the ExoSynergy framework for final-year group research project.
- Built an ML based pipeline for spectral data preprocessing and atmospheric key feature prediction
- Implemented AI-based inference system for biosignature detection
- Developed RESTful API for model integration and data processing workflows

Technologies: Python, FastAPI, PyTorch, Scikit-learn, Pandas, NumPy, SciPy, TypeScript

Crime Radar

Feb 2025 – June 2025

Web platform for real-time crime reporting, awareness, and incident management with separate admin and user functionalities.

- Led development team and managed GitHub version control workflow
- Implemented crime reporting, tracking, and user management modules
- Designed and developed core frontend and backend features

Technologies: MERN Stack (MongoDB, Express.js, React.js, Node.js), Tailwind CSS

[GitHub](#)

Personal Portfolio

Dec 2025 – June 2026

Responsive personal portfolio website developed to showcase projects, skills, and professional experience.

- Designed and developed modern responsive UI/UX
- Implemented smooth navigation and component-based architecture
- Optimized performance using Vite build tool and React best practices

Technologies: React.js, Vite, Tailwind CSS, CSS3

[Live Link](#) [GitHub](#)

Rangiri Holdings Website

Oct 2025 – Dec 2025

Professional corporate website built to enhance digital presence and showcase services, CSR activities, and business achievements.

- Developed server-side rendered (SSR) website for SEO optimization
- Built responsive and scalable UI components
- Integrated contact and engagement sections for users

Technologies: Next.js 15, React, Tailwind CSS, Framer Motion

[Live Link](#) [GitHub](#)

Rangiri Aqua Website

Oct 2025 – Dec 2025

Corporate website showcasing adventure training, corporate events, and team-building services with interactive user experience.

- Developed fully responsive informational website
- Designed structured service presentation and user navigation flow

Technologies: HTML5, CSS3, JavaScript
